No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

WEATHER KEY POINTS

05/01/22 - 05/07/22

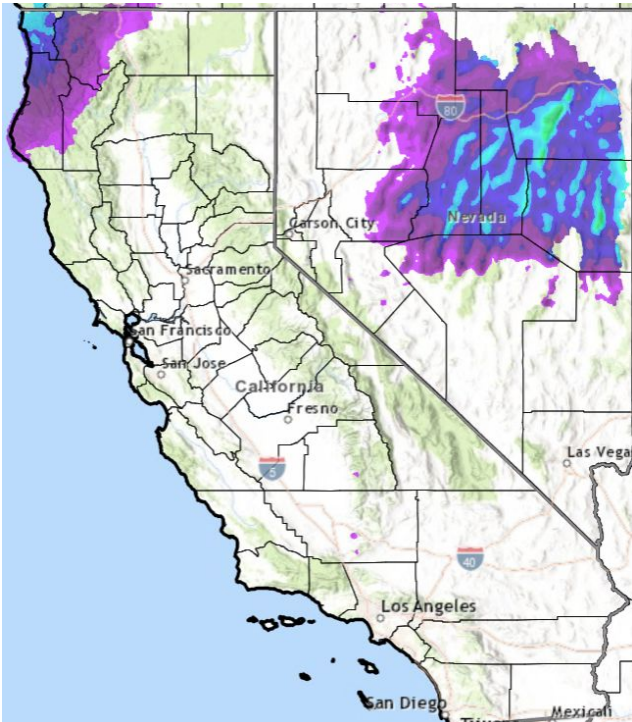

Sunday - Saturday

- Minor heat impacts will continue across primarily interior valleys/deserts of Southern and Inland regions through much of the week
 - Locally moderate heat risk concerns could develop for Thursday through Saturday, primarily in the deserts of Southern Region
- Most of the state will remain dry through the next week, but a series of storm systems will bring periods of primarily light precipitation to far northern California
 - The best periods of precipitation along the Oregon border currently look to be on Monday and Thursday/Friday
 - Each of these storms will also bring periods of gusty winds to much of the state, though most wind impacts do not appear to be significant
 - The strongest winds will generally be seen across the higher terrain (including much of the Sierra on Monday) and interior portions of southern California, as well as locally stronger winds in locations such as Santa Barbara County and the Antelope Valley through Monday
 - Areas of blowing dust are possible across desert areas, especially Monday afternoon/evening

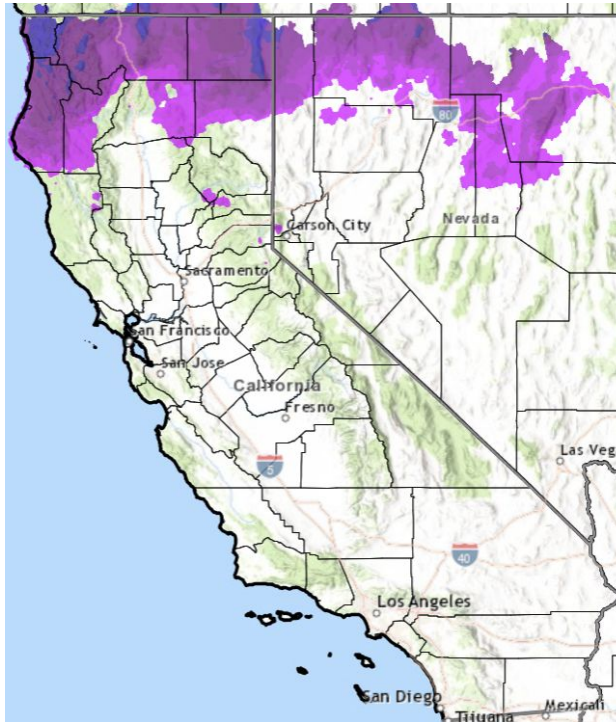

PRECIPITATION FORECAST

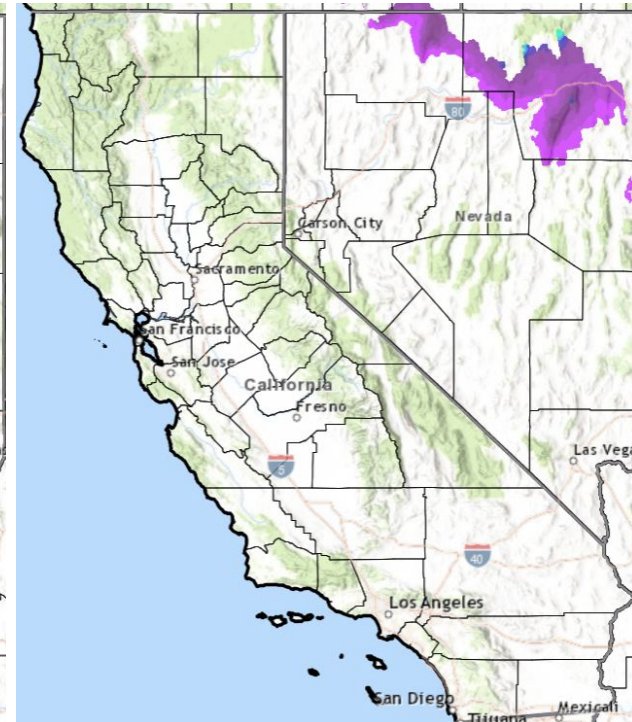

05/01/22 - 05/03/22

Sunday

Monday

Tuesday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

05/06/22 - 05/14/22

6-10 Day Outlook (May 6 - May 10)

Temperatures

- Below normal temperatures favored for the northern half of the state, with near normal temperatures favored for the southern half of California

Precipitation

- Above normal precipitation is favored for northern California, with near normal precipitation favored for central and southern California

8-14 Day Outlook (May 8 – May 14)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Below normal precipitation is slightly favored for most of the state
